Petitioner: James Sherrod Sherrod Signs

Staff Report

Knoxville Historic Zoning Commission

File Number: 5-H-21-HZ

Meeting: 5/20/2021
Applicant: James Sherrod Sherrod Signs
Owner: Square Properties LLC

Property Information

Location: 24 Market Square **Parcel ID** 94 L E 040
District: Market Square H
Zoning: DK (Downtown Knoxville)
Description: Victorian Vernacular Commercial, c.1880

Two-story brick building with three-bays, arched second-story windows with corbelled arched window hoods with replacement sashes and a corbelled brick cornice. Altered c.1930s storefront.

Description of Work

Level II Installation of Signage

New sign to be attached to center of projecting, flat-roof canopy. Sign measures 3' tall by 4'-8" wide (13 sq. ft.) overall, featuring a semi-circle section on top of a rectangular base. The sign will be illuminated with green and gold neon tubing, with transformer and associated electrical equipment located within the sign. The sign will be centered on the projecting canopy, below the middle second-story window, located towards the edge of the canopy, perpendicular to the building façade.

Applicable Design Guidelines

Market Square Design Guidelines and Designation Report, adopted by the Knoxville City Council on July 24, 2001.

1. A storefront shall not have more than two signs, a primary and a secondary sign. One of these may be a flush-mounted sign board located below the second story window sills and above the storefront display windows. It should not be more than 2-1/2' high with lettering between 8" and 18" high and covering about 65% of the sign board.
2. A hanging sign can be mounted above the sidewalk, projecting no more than five feet. It could represent the image of a product or use text to identify a tenant and should be 4-6 square feet in area.
4. Signs may be used on awnings, but shall be configured with contrasting letters painted or sewn onto the awnings valance.
5. Signs can be directly or indirectly illuminated. Internally lit signs that respect the dimensions noted above for flush-mounted sign boards can be appropriate. Neon can be appropriate for flush-mounted sign boards and window signs.

Comments

N/A

Staff Findings

1. 24 Market Square is a contributing resource to the Market Square National Register Historic district and the local overlays.
 2. Signs which directly correspond with the design guidelines are often approved on a staff level in Historic overlays. The proposed sign is larger from the recommended size for a projecting sign (13 sq. ft. vs. the recommended 4-6 sq. ft.), and has a unique placement. Due to the new flat canopy that extends the length of the building, the proposed building could not have a projecting/hanging sign in the typical area. The sign is proposed to be placed on the new awning, centered on the awning and below the second-story window, and perpendicular to the façade. On this property, placement of the sign is appropriate.
 3. Neon is noted in the design guidelines as appropriate for sign boards and window signs. There are several larger-sized neon signs installed on Gay Street, on historic commercial buildings which contribute to the Gay Street Commercial National Register Historic District.
 4. All electrical equipment/transformers will be located within the overall sign box, so no additional wires or fixtures will be visible from the right-of-way. The installation should follow the proposed drawings, with no transformers, electrical equipment, or wires located outside of the sign cabinet.
 5. The placement of the sign will not affect (or even touch) character-defining features or historic materials on the façade, due to the installation on the awning. The sign could be removed without effect on the historic building.
-

Staff Recommendation

Staff recommends approval of the project as submitted, with the condition that no transformers, associated electrical equipment, or wires are located outside of the sign cabinet.
