ARCHITECTS + INTERIORS + PLANNING

Project Name: **An Addition and Renovation of 141 S. Gay St.**
Project No: **17014** File No.: I01

Date / Time: 2017/06/02

To: Mike Reynolds, MPC
From: Patrick Core, Design Innovation (DIA)

PROJECT INFORMATION

Project location - 141 S. Gay St.

Existing use – mixed use, restaurant at ground level and residential at upper level

Proposed use – same as existing

Per Downtown Knoxville Design Guidelines the property is within the Grid District, within National Register Historic District, and is a National Register Historic Site.

From Downtown Knoxville Design Guidelines

B. PRIVATE REALM

3. BUILDING MATERIALS

New building materials should relate to the scale, durability, color, and texture of the predominate building materials in the area.

GUIDELINES:

3a. Use complimentary materials and elements, especially next to historic buildings.

3b. Rehabilitate historic structures in accordance with the Secretary of Interior's Standards (see Appendix A)

Durable materials such as metal panel or fibercement board siding will be used for exterior walls. Colors will be complementary to adjacent painted gray brick building at corner of Vine Ave. and Gay St.

4. ARCHITECTURAL CHARACTER

Buildings should be visually interesting to invite exploration by pedestrians. A building should express human scale through materials and forms that were seen traditionally. This is important because buildings are experienced at proximity by the pedestrian.

GUIDELINES: 4f. Encourage the use of 'green roofs' and other sustainable practices, while minimizing the visual impact from the street.

A "green screen" vertical privacy trellis planned at the roof deck level. This will include planters and vines.

6. RESIDENTIAL BUILDINGS

Solely residential buildings, such as townhouses and apartment buildings, are rare in downtown Knoxville. Privacy and safety are concerns with residential units that meet the sidewalk. Mixed use buildings, with apartments above shops or offices, can avoid these challenges and add to downtown vitality

Existing mixed use configuration will be maintained. Privacy screens and / or landscaping at roof deck will be used for visual privacy at residential areas.

7. MECHANICAL EQUIPMENT AND SERVICE UTILITIES

Utilities can include telephone and electrical lines, ventilation systems, gas meters, air conditioners, fire protection, telecommunication and alarm systems. Adequate space for these utilities should be planned in a project from the outset and they should be designed such that their visual and noise impacts are minimized.

No new penetrations are planned at the Gay St. elevation. If feasible, some of the existing equipment / conduit / piping etc. will be organized or concealed. New equipment and utilities will be concealed within the building or screened to the greatest degree possible.

C. HISTORIC RESOURCES

1. ROOFLINES AND ADDITIONS

Alterations of the rooflines of historic buildings are not appropriate. A one-story rooftop addition, including railings, may be possible on taller buildings if it is inconspicuous from the public right-of-way. Additions should be set back from the primary elevation of the building, and should not damage character-defining features, including parapets and side walls. These walls are often topped by coping stones offering contrasting color or texture, or contain cornices, decorative grills, chimneys, corbelled brickwork and other architectural elements. Rooftop additions are almost never appropriate on buildings less than four stories in height.

1a. Preserve or restore historic roofline features, including parapet walls and cornices.

1b. Design rooftop additions to be complimentary to the historic building in terms of materials and color.

1c. Avoid construction that maintains only the historic facade.

1d. Do not alter, obscure or destroy significant features of historic resources when constructing additions.

1e. Design rooftop additions so that they are not seen from adjoining streets and sidewalks.

There will be no modifications to the Gay St. elevation. The new addition above the storage room will not be visible from the pedestrian level of Gay St.

C. HISTORIC RESOURCES

5. MASONRY

Masonry features should be retained and repaired; materials, including mortar, should match the original mortar in color and composition. Mortar joints should be sized and struck to match the original. Belt courses, string courses, dripstones, quoins and contrasting brick and stone are common. These features should be preserved and repaired if necessary, and should be introduced on infill buildings.

GUIDELINES:

5a. Repair masonry with stone or brick and mortar that match the original.

5b. Do not paint masonry that has never been painted.

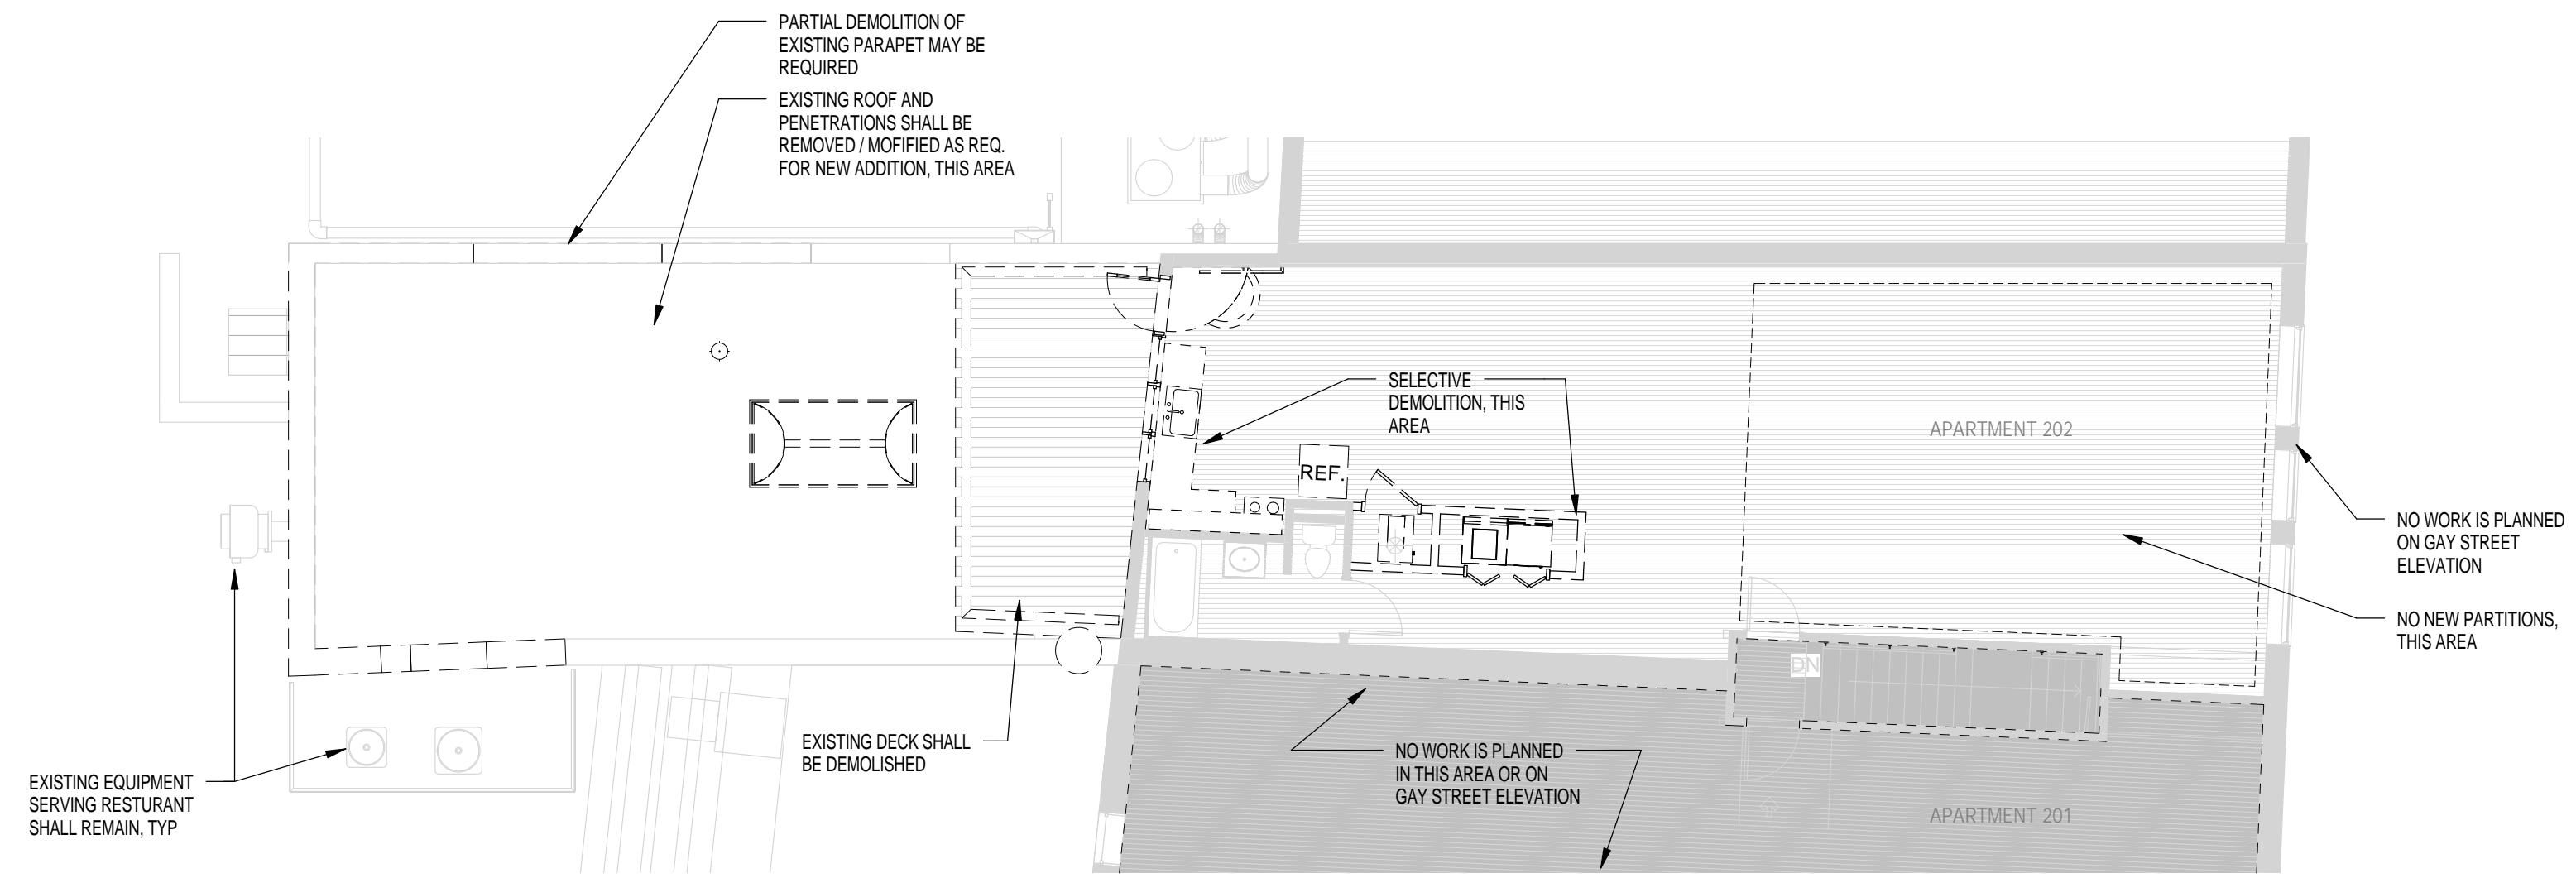

The existing brick walls of the storage room at the ground level will be repointed in select deteriorated areas. Mortar joints will match original in size and composition.

9. LIGHTING

Storefront windows may be lit with interior fixtures, entrances may be lit with overhead fixtures, and gooseneck fixtures can be used to highlight signs. Illumination may also be used to wash the building in light, emphasizing its distinctive architectural finishes

No building lighting will be added along Gay St. Lighting at the addition will be recessed can lights in new ceilings.
