Design Review Board

File Number: 4-A-23-DT

Meeting: 4/19/2023

Project: Whist Court

Applicant: Logan Higgins Heyoh Design & Development

Property Information

Location: 400 W. Magnolia Ave. **Parcel ID** 94 E K 003

Zoning: DK (Downtown Knoxville)

Description:

Two-story, brick masonry commercial building with side entrance fronting W. Magnolia Ave.

Description of Work

Level II Major Alteration of an Existing Building/Structure

Exterior rehabilitation, focusing on rear (southwest) elevation of existing building. Removal of one double-hung window and installation of new full-light door with transom in the same location. Door will access an entrance landing with a new guardrail and a new concrete ramp with a steel handrail. Exterior rehabilitation work will also include the installation of outdoor seating and planters in the private courtyard behind the building.

Applicable Design Guidelines

Downtown Design Guidelines

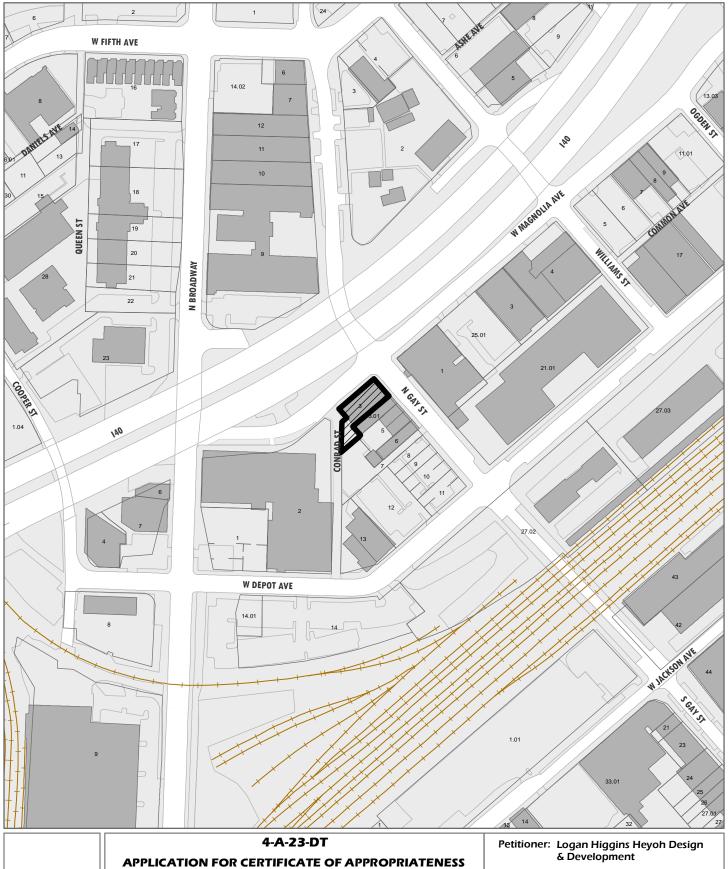

- 5. Ground Floor Doors and Windows
- 5a. Use consistent rhythm of openings, windows, doorways, and entries.
- 5b. Orient primary front entrances to the main street; secondary entrances should be clearly defined and oriented to streets or alleys, as appropriate.
- 5c. Design entrances according to the proportions of the building's height and width.
- 5e. All windows at the pedestrian level should be clear.
- 6. Residential Buildings
- 6a. Elevate the first floor of townhouses and apartment buildings so that pedestrians cannot look directly into the residence from the sidewalk level.
- 6b. Design entrances to residential buildings so that access is separated from pedestrian flow on the sidewalk.

Comments

400 W. Magnolia Ave (Whist Court) is not listed on the NRHP so the Historic Resources section of the guidelines does not apply. The proposal meets the design guidelines as retains or increases pedestrian-level transparency, provides secondary access to the residential units, and will replace a window with a door of a similar size and design. The finish and material of the new entrance will match the existing black windows. The work is concentrated on the rear elevation, less visible from the primary streets. A right-of-way agreement with the City of Knoxville may be required for the landing and rear access which are currently proposed within right-of-way.

R

| Staff recommends approval of Certificate 4-A-23-DT, subject to one condition: 1) meeting all applicable right-of-wa requirements with the City of Knoxville. | | | | | |

PROJECT OVERVIEW

The Whist Court building is an existing structure at 400 W Magnolia Ave.

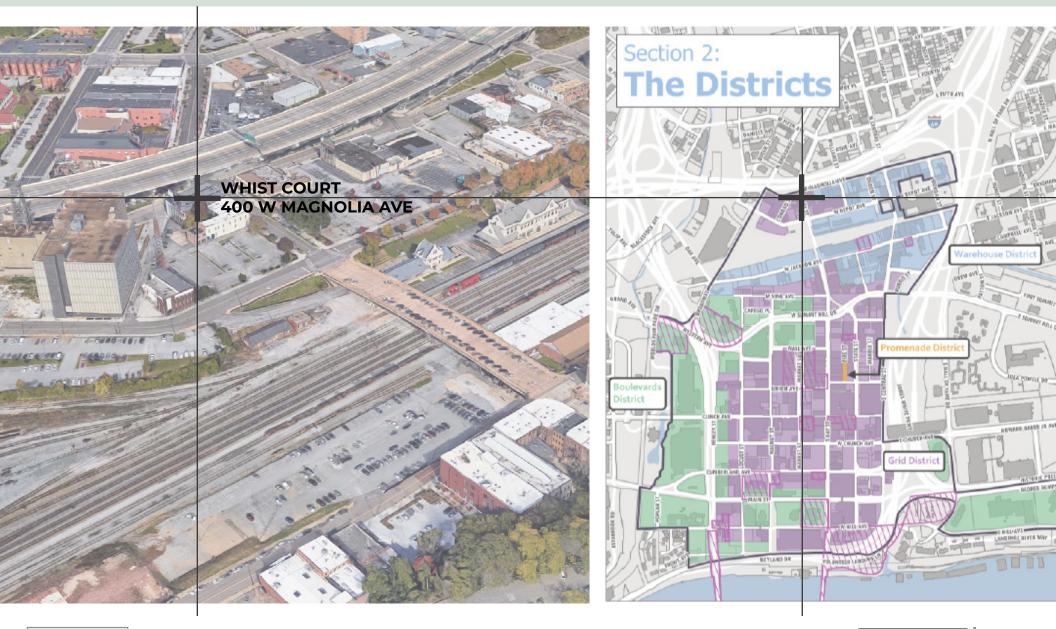

In an effort to increase the safety and comfort of the building's residents and their guests, we are proposing adapting an existing window location for a new accessible entrance at the rear for direct access to the parking lot within the gated fence.

This application has been prepared to seek approval from the Design Review Board under the City of Knoxville's Downtown Design Guidelines.

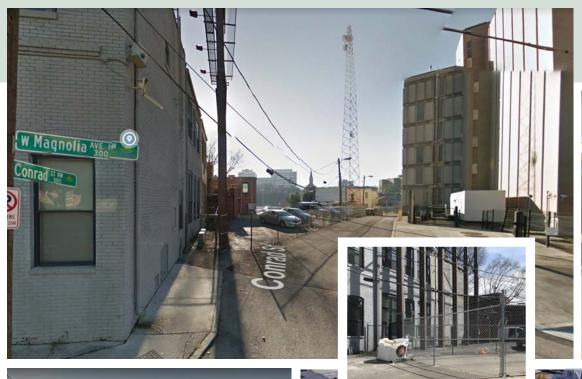

Heyohdesign.com 865.236.0430 Admin@heyohdesign.com

PROJECT LOCATION IN DESIGN GUIDELINE BOUNDARIES

The property is bordered by Magnolia Ave. and the I-40 viaduct with the primary pedestrian traffic being the homeless population connecting to and from Gay St. and Broadway. Conrad St. appears to be permanently fenced off with dead end sidewalks.

DESIGN GUIDELINES

B. PRIVATE REALM

5. GROUND FLOOR DOORS AND WINDOWS

Entrances and ground floor windows should foster pedestrian comfort, safety and orientation. Not every building in downtown needs to have the same window or entry designs; however, repeating the pattern of historic openings helps to reinforce the character of downtown, differentiating it from suburban areas.

GUIDELINES

5a. Use consistent rhythm of openings, windows, doorways, and entries.

5b. Orient primary front entrances to the main street; secondary entrances should be clearly defined and oriented to streets or alleys, as appropriate.

5c. Design entrances according to the proportions of the building's height and width.

5d. Consider corner entrances at the ends of blocks.

5e. All windows at the pedestrian level should be clear

5f. Recess ground floor window frames and doors from the exterior building face to provide depth to the facade.

These recommendations have been followed as applicable.

6. RESIDENTIAL BUILDINGS

Solely residential buildings, such as townhouses and apartment buildings, are rare in downtown Knoxville. **Privacy and safety are concerns with residential units that meet the sidewalk.** Mixed use buildings, with apartments above shops or offices, can avoid these challenges and add to downtown vitality.

GUIDELINES

6a. Elevate the first floor of townhouses and apartment buildings so that pedestrians

cannot look directly into the residence from the sidewalk level.

6b. Design entrances to residential buildings so that access is separated from pedestrian

flow on the sidewalk.

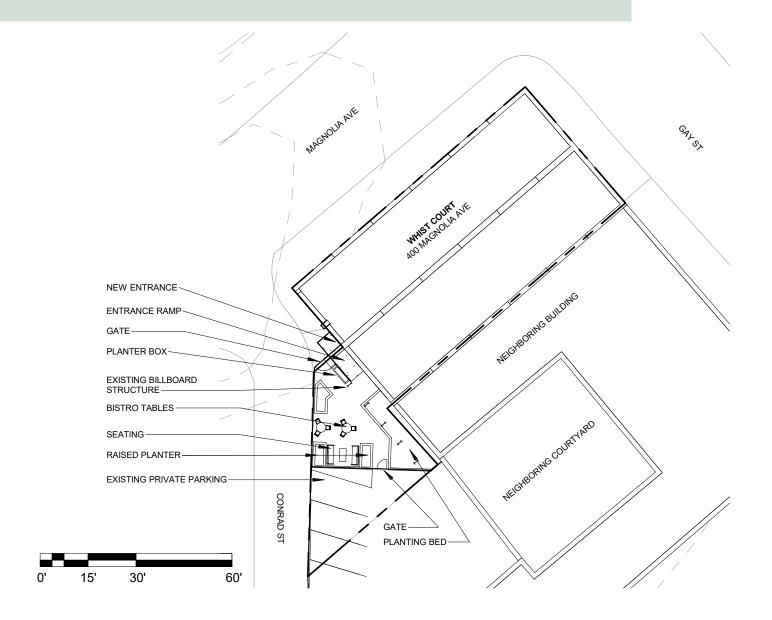

6c. Encourage the development of mixed-use buildings with apartments over lower story commercial uses.

6d. Provide yard space for apartment buildings in the Boulevard District.

These recommendations have been followed as applicable.
